The Pfizer vaccine will be administered to residents age 16 and 17. A parent or guardian must be present when teens, under the age of 18 are vaccinated.

Residents are being offered both the Moderna and Pfizer COVID-19 vaccines. The Moderna vaccine is administered in **2 doses, 1 month apart**, while the Pfizer vaccine requires **2 doses 3 weeks apart**. It is important to receive the second dose **as close to the 1-month or 3-week interval as possible** for the vaccine to be most effective. The Johnson and Johnson vaccine is also now available at some locations and **only requires one dose**. For questions or concerns about both vaccines visit mayoclinic.org/diseases-conditions/coronavirus/in-depth/coronavirus-vaccine/art-20484859. **Do not take any Tylenol or Ibuprofen immediately prior to receiving your vaccination.**

Even after receiving **both doses** of the vaccine, and until more is understood about the protection the vaccine provides, it is important to continue following recommendations for mask wearing, social distancing and hand washing. **If you exhibit symptoms, you should still get tested for the virus.** For an up-to-date list of frequently asked questions please visit tmh.org/coronavirus/frequently-asked-questions.
